DETAILED ACTION

Election/Restrictions

1. This application now contains claims directed to the following patentably distinct Species of Group I (with Group I identified in paper 8 mailed 2/7/03):

Group I = A semiconductor device *test head assembly* with *spring contacts*, an *interposer* (i.e. space transformer, intermediate wire-routing board, etc..) and a *fixture* [see paper 8].

Species IA = Group I with a pair of beams for a contact [e.g. Figs. 14 &15].

Species IB = Group I with a single beam for a contact [e.g. Figs. 2 through 8].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 34 and/or 51 seem generic, yet applicant should clarify which claim(s) actually is/are generic, for a proper and helpful response.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141.

If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Citation of Prior Art

4. Mok et al. (US 2002/0171133) is cited for disclosing spring contacts suitable for an interposer (abstract) wherein each spring contact (e.g. 61 in the cover figure) is seemingly patentably indistinct from "a beam contoured to affect a deflection characteristic of the beam" wherein the "beam is contoured (in the shape of an arc) along a length of said beam."

Mok et al. is timely as well as relevant, in view of applicant's Figs. 17 and 18 being part of new matter added in a CIP after June 2000 when Mok et al. filed provisional applications.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evan Pert whose telephone number is 703-306-5689. The examiner can normally be reached on M-F (7:30AM-3:30 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamand Cuneo can be reached on 703-308-1233. The fax phone number for the organization where this application or proceeding is assigned is 703-308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308-0956.
